No-Sweat Homeschooling Kelly Wallace 2018-03-14 The decision to home school your kids is one you'll never regret, though the path can often be confusing and frustrating. I fully believe that homeschooling should be as much fun for you as it is for your children. After all, you'll be spending many hours each week together learning new things, so why make it monotonous, stressful, or boring? Instead, with a bit of ingenuity, you can turn even the smallest everyday task into a learning opportunity that sticks with your children for life. This is what No Sweat Home Schooling is all about. I'll cover whole curriculum subjects, frugal field trips, record keeping, fun activities, stress and mess busters, the Charlotte Mason Method, and more. I also include a lot of quality online resources. I look forward to sharing my experiences and ideas with you!

Math from Three to Seven Aleksandr Kalmanovich Zvonkin 2011 This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s. As anyone who has taught or raised young children knows, mathematical education for little kids is a real mystery. What are they capable of? What should they learn first? How hard should they work? Should they even "work" at all? Should we push them, or just let them be? There are no correct answers to these questions, and the author deals with them in classic math-circle style: he doesn't ask and then answer a question, but shows us a problem--be it mathematical or pedagogical--and describes to us what happened. His book is a narrative about what he did, what he tried, what worked, what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half-dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual development in young children will find this book to be an invaluable, inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).
