France in the World Patrick Boucheron 2021-08-19 A fresh, provocative history that renews our understanding of France in the world through short, incisive essays ranging from prehistoric frescoes to Coco Chanel to the terrorist attacks of 2015. Bringing together an impressive group of established and up-and-coming historians, this bestselling history conceives of France not as a fixed, rooted entity, but instead as a place and an idea in flux, moving beyond all borders and frontiers, shaped by exchanges and mixtures. Presented in chronological order from 34,000 BC to 2015, each chapter covers a significant year from its own particular angle – the marriage of a Viking leader to a Carolingian princess proposed by Charles the Fat in 882, the Persian embassy's reception at the court of Louis XIV in 1715, the Chilean coup d'état against President Salvador Allende in 1973 that mobilised a generation of French left-wing activists. France in the World combines the intellectual rigour of an academic work with the liveliness and readability of popular history. With a brand-new preface aimed at an international audience, this English-language edition will inspire Francophiles and scholars alike.

Defeat and Division Douglas Porch 2022-08-25 Defeat and Division launches a definitive new account of France in the Second World War. In this first volume, Douglas Porch dissects France's 1940 collapse, the dynamics of occupation, and the rise of Charles de Gaulle's Free France crusade, culminating in the November 1942 Allied invasion of French North Africa. He captures the full sweep of France's wartime experience in Europe, Africa, and beyond, from soldiers and POWs to civilians-in-arms, colonial subjects, and foreign refugees. He recounts France's struggles to reconstruct military power within the context of a global conflict, with its armed forces shattered into warring factions and the country under Axis occupation. Disagreements over the causes of the 1940 debacle and the subsequent requirement for the armistice mirrored long-standing fractures in politics, society, and the French military itself, as efforts to reconstitute French military power crumbled into Vichy collaboration, De Gaulle's exile resistance, Alsace-Moselle occupation struggles, and a scuffle for imperial supremacy.

Risk Assessment Methods for Biological and Chemical Hazards in Food Fernando Pérez-Rodríguez 2020-10-28 Risk assessment has been extensively developed in several scientific fields, such as environmental science, economics, and civil engineering, among others. In the aftermath of the SPS and GATT agreements on the use of risk analysis framework in food trade, signed in the 1990s, international organisations and governments adopted risk assessment as a science-based process to ensure food safety along the food chain. The food industry can also benefit from the use of this approach for food process optimisation and quality assurance. Risk Assessment Methods for Biological and Chemical Hazards in Food introduces the reader to quantitative risk assessment methods encompassing general concepts to specific applications to biological and chemical hazards in foods. In the first section, the book presents food risk assessment as methodology and addresses, more specifically, new trends and approaches such as the development of risk rating methods, risk metrics, risk-benefit assessment studies and quality assessment methods. Section II is dedicated to biological hazards. This section identifies the most relevant biological hazards along the food chain and provides an overview on the types of predictive microbiology models used to describe the microbial response along the food chain. Chapter 12 specifically deals with cross contamination and the quantitative methods that can be applied to describe this relevant microbial process. The development and application of dose-response models (i.e. mathematical function describing the relationship between pathogen dose and health response) are also covered in this section. In Section III, the book translates risk assessment concepts into the area of chemical hazards, defining the process steps to determine chemical risk and describing the uncertainty and variability sources associated with chemicals. Key Features: Presents new trends and approaches in the field of risk assessment in foods Risk assessment concepts are illustrated by practical examples in the food sector Discusses how quantitative information and models are integrated in a quantitative risk assment framework Provides examples of applications of quantitative chemical risk assessment in risk management The book, written by renowned experts in their field, is a comprehensive collection of quantitative methods and approaches applied to risk assessment in foods. It can be used as an extensive guide for food safety practitioners and researchers to perform quantitative risk assessment in foods

Annual Report of the Commissioner of Labor United States. Dept. of Labor 1892

French Studies in and for the Twenty-first Century Philippe Lane 2011 With contributions from leading scholars across the entire range of French studies, this up-to-date volume examines both the current state of French studies in the United Kingdom, as well as its future in an increasingly interdisciplinary world where student demand, new technologies, and developments in transnational education are changing the ways in which we teach, learn, research and assess achievements. Required reading for French studies scholars worldwide, this volume builds upon the findings of the influential Review of Modern Foreign Languages Provision in Higher Education and maps the present and future of the field.

French Studies in and for the 21st Century Philippe Lane 2011-07-07 French Studies in and for the 21st Century draws together a range of key scholars to examine the current state of French Studies in the UK, taking account of the variety of factors which have made the discipline what it is. The book looks ahead to the place of French Studies in a world that is increasingly interdisciplinary, and where student demands, new technologies and transnational education are changing the ways in which we learn, teach, research and assess. Required reading for all UK French Studies scholars, the book will also be an essential text for the French Studies community worldwide as it grapples with current demands and plans for the future.

Policing in France Jacques de Maillard 2020-08-03 The eminent contributors to a new collection, Policing in France, provide an updated and realistic picture of how the French police system really works in the 21st century. In most international comparisons, France typifies the "Napoleonic" model for policing, one featuring administrative and political centralization, a strong hierarchical structure, distance from local communities, and a high priority on political policing. France has undergone a process of pluralization in the last 30 years. French administrative and political decentralization has reemphasized the role of local authorities in public security policies; the private security industry has grown significantly; and new kinds of governing models (based on arrangements such as contracts for service provision) have emerged. In addition, during this period, police organizations have been driven toward central government control through the imposition of performance indicators, and a top-down decision was made to integrate the national gendarmerie into the Ministry of Interior. The book addresses how police legitimacy differs across socioeconomic, generational, territorial, and ethnic lines. An analysis of the policing of banlieues (deprived neighborhoods) illustrates the convergence of contradictory police goals, police violence, the concentration of poverty, and entrenched opposition to the states' representatives, and questions policing strategies such as the use of identity checks. The collection also frames the scope of community policing initiatives required to deal with the public's security needs and delves into the security challenges presented by terrorist threats and the nuances of the relationship between policing and intelligence agencies. Identifying and explaining the diverse challenges facing French police organizations and how they have been responding to them, this book draws upon a flourishing French-language literature in history, sociology, political science, and law to produce this new English-language synthesis on policing in France. This book is a valuable resource for researchers and practitioners working in and around French policing, as well as students of international law enforcement.

Division of Documents 1905 A subject index, "compiled in compliance with the provisions of a joint resolution approved March 3, 1897, which directs the preparation of an index to all publications of the government from 1881, the date at which the Descriptive catalogue of government publications by Ben: Perley Poore terminates, to 1893, the date at which the index by the superintendent of documents begins, said index to conform in its general plan to ... [Ames'] Comprehensive index of government publications from 1889 to 1893, ' published in 1894."

Advertising Cultures Sean Nixon 2003-02-25 'Nixon's study is a major contribution to the cultural sociology of the new service sector professionals and their gendered identities.It's importance lies in it's skilful synthesis of detailed ethnographic research and social theory. This is a genuinely innovative book which reopens cultural debate about advertising and society' - Frank Mort, Professor of Cultural History, University of East London 'Advertising Cultures is a lucid, thorough and highly engaging account of advertising creatives that unlocks two crucial issues for understanding the culture industries: creativity and gender. It marks a major new contribution to the cultural study of economic life' - Don Slater, London School of Economics The economic and cultural role of the `creative industries' has gained a new prominence and centrality in recent years. This new salience is explored here through the most emblematic creative industry: advertising. Advertising Cultures also marks a significant contribution to the study of gender and of commercial cultures through its detailing of the way gender is written into the creative cultures of advertising and into the subjective identities of its key practitioners.

Getting Personal Nancy K. Miller 2014-06-03 In the era of identity politics, whose is the I of cultural criticism? And what does the invention of an autobiographical persona have to do with contemporary theory? In *Getting Personal*, Nancy K. Miller reflects upon the ways in which contingencies of identity and location shape the writing of academic argument and the living of an academic life. *Getting Personal* explores the new territory of feminist cultural studies and its connections to literary interpretation. The book is organized around a number of academic scenes in which Miller analyses the stakes of feminist critical performance. The focus on occasions, from the conference to the seminar to the professional colloquium, produces an autobiographical perspective on the mini-drama of institutional politics - whether faculty struggles over the canon in elite universities, or student strivings for self-authorization in large urban ones. Writing as a feminist critic, Miller describes the dilemmas of a responsible pedogogic practice: the contradictory demands of authority and complicity for a feminist teacher of literature. *Getting Personal* examines the rhetorical strategies of a feminism traversed by internal debates over its own self-representations. Working through and among quotations of voices that might otherwise not address each other, Miller assesses a crisis and offers a project for moving on.
