Breaking News Martin Fletcher
2008-03-04 Martin Fletcher doesn't claim to be a hero. Yet he didn't flinch, either. During three decades covering wars, revolutions, and natural disasters, Fletcher worked his way from news agency cameraman to top network correspondent, facing down his own fears while facing up to mass killers, warlords, and murderers. With humor and elegance, Fletcher describes his growth from clueless adventurer to grizzled veteran of the world's battlefields. His working philosophy of "Get in, get close,

get out, get a drink," put him repeatedly in harm's way, but he never lost sight of why he did it. In a world obsessed with celebrities, leaders, and wealth, Fletcher took a different route: he focused on those left behind, those paying the price. He answers the question: Why should we care? These extraordinary, real-life adventure stories each examine different dilemmas facing a foreign correspondent. Can you eat the food of a warlord, who stole it from the starving? Do you listen politely to a terrorist threatening to blow up your children? Do you ask the tough questions of a Khmer Rouge killer, knowing he is your only ticket out of the

Cambodian jungle? And above all, how do you stay sane faced with so much pain?

The Troubles of Journalism

William A. Hachten 2005-01-15

This book looks at criticisms of the journalism profession and evaluates many of the changes in journalism--both positive and negative. In addition, it suggests what the many changes mean

for this nation and indeed for the world at large, as American journalism--its methods and standards--has markedly influenced the way many millions overseas receive news and view their world. Based on author William Hachten's 50-year involvement with newspapers and journalism education, *The Troubles of Journalism* serves as a realistic examination of the profession, and is appropriate for upper-level undergraduate courses in journalism and media criticism. Since the previous edition of *The Troubles of Journalism*, many significant challenges have occurred in the media: the events of September 11, the

war on terrorism, mergers and consolidation of media ownership, new concerns about press credibility, the expanding and controversial role of cable news channels, the growing impact role of news and comment on the Internet, and continuing globalization and controversy over the role of American media in international communications. To do justice to these recent "troubles" of the news media, important additions and modifications have been made in every chapter of this Third Edition.

The Illustrated Life Of Paul

Charles L Quarles 2014-06-01

Except for the Lord Jesus himself, no person has been more influential in the history of the church than Saul of Tarsus. Paul's influence upon the early church's most cherished convictions is so clear and powerful that some scholars have dared to describe him as the founder of Christianity. Paul had a greater impact on the formation of the Christian church than any other apostle. He wrote thirteen of the twenty-seven books of the New Testament so that nearly half of the New Testament documents bear his name. Although some

of Paul's letters are brief compared to other New Testament books, his epistles compromise approximately one-fourth of the total volume of the New Testament. Approximately sixteen chapters of the Book of Acts focus on Paul's persecution of the church, conversion, missionary labors, arrest and imprisonment. When these chapters are combined with Paul's letters, Paul may be recognized as the author or subject of nearly one-third of the New Testament. Paul was not only the most effective Christian missionary and church planter in history, but also the most significant and influential interpreter of Jesus' teachings

and of the significance of Jesus' life, death, resurrection, and return. This book introduces readers to this amazing man and his incredible story. It explains the background of each of Paul's letters and offers a summary of the beliefs of one of the keenest theological minds in the history of the church. All along, it enables the reader an opportunity to step into the world of Paul with over 150 photos, maps, illustrations, and charts.

Foreign News and the New
World Information Order Robert
L. Stevenson 1984 A collection

of 14 essays analyzing the debate over systems of information and communication in the world. These tend to confirm the impression that the availability of news from outside national borders has grown, but its distribution is unbalanced and its utilization is limited and uneven. The first part was issued by USIA as a research report "Foreign News and the New World Information Order." Other papers which appeared as convention papers and as part of a Unesco research project discuss the cultural meaning of foreign news, "bad news" and the Third World, a comparative study of Third World elite newspapers, Egypt

and Israel in the Arab Press, foreign news in the Western agencies and the determinants of foreign news coverage in the U.S. press. ISBN

Closing the Feedback Loop

Björn-Sören Gigler 2014-05-22

This book is a collection of articles, written by both academics and practitioners as

an evidence base for citizen engagement through information and communication technologies (ICTs). In it, the authors ask: how do ICTs empower through participation, transparency and accountability? Specifically, the authors examine two principal questions: Are technologies an accelerator to closing the “accountability gap” – the space between the supply (governments, service providers) and demand (citizens, communities, civil society organizations or CSOs) that requires bridging for open and collaborative governance? And under what conditions does this occur? The introductory

chapters lay the theoretical groundwork for understanding the potential of technologies to achieving intended goals. Chapter 1 takes us through the theoretical linkages between empowerment, participation, transparency and accountability. In Chapter 2, the authors devise an informational capability framework, relating human abilities and well-being to the use of ICTs. The chapters to follow highlight practical examples that operationalize ICT-led initiatives. Chapter 3 reviews a sample of projects targeting the goals of transparency and accountability in governance to make preliminary conclusions around

what evidence exists to date, and where to go from here. In chapter 4, the author reviews the process of interactive community mapping (ICM) with examples that support general local development and others that mitigate natural disasters. Chapter 5 examines crowdsourcing in fragile states to track aid flows, report on incitement or organize grassroots movements. In chapter 6, the author reviews Check My School (CMS), a community monitoring project in the Philippines designed to track the provision of services in public schools. Chapter 7 introduces four key ICT-led, citizen-governance initiatives in

primary health care in Karnataka, India. Chapter 8 analyzes the World Bank Institute's use of ICTs in expanding citizen project input to understand the extent to which technologies can either engender a new "feedback loop" or ameliorate a "broken loop". The authors' analysis of the evidence signals ICTs as an accelerator to closing the "accountability gap". In Chapter 9, the authors conclude with the Loch Ness model to illustrate how technologies contribute to shrinking the gap, why the gap remains open in many cases, and what can be done to help close it. This collection is a critical addition to existing

literature on ICTs and citizen engagement for two main reasons: first, it is expansive, covering initiatives that leverage a wide range of technology tools, from mobile phone reporting to crowdsourcing to interactive mapping; second, it is the first of its kind to offer concrete recommendations on how to close feedback loops.

Breaking News Alan Rusbridger
2018-11-27 An urgent account of the revolution that has upended the news business, written by one of the most accomplished journalists of our time Technology has radically altered the news landscape. Once-powerful newspapers have lost their clout or been

purchased by owners with particular agendas. Algorithms select which stories we see.

The Internet allows consequential revelations, closely guarded secrets, and dangerous misinformation to spread at the speed of a click.

In *Breaking News*, Alan Rusbridger demonstrates how these decisive shifts have occurred, and what they mean for the future of democracy. In the twenty years he spent editing *The Guardian*, Rusbridger managed the transformation of the progressive British daily into the most visited serious English-language newspaper site in the world. He oversaw an

extraordinary run of world-shaking scoops, including the exposure of phone hacking by London tabloids, the Wikileaks release of U.S.diplomatic cables, and later the revelation of Edward Snowden's National Security Agency files. At the same time, Rusbridger helped The Guardian become a pioneer in Internet journalism,

stressing free access and robust interactions with readers. Here, Rusbridger vividly observes the media's transformation from close range while also offering a vital assessment of the risks and rewards of practicing journalism in a high-impact, high-stress time.
