The Educational Trends 1967-05

Exploring Education at Postgraduate Level Anne O'Grady 2015-09-25

There is a growing demand for educational professionals to develop a more critical understanding of the key and emerging debates in education so that they can better meet the challenges and demands placed upon them.

Exploring Education at Postgraduate Level represents a range of perspectives from educational experts to academic researchers, and highlights the key issues surrounding contemporary education. Organised into three parts and drawing on key

issues in education theory, policy and practice, the book considers areas such as SEN, evaluating learning, ESOL and gender. Featuring reflective questions, case studies and summaries of core ideas, the chapters include: Troublesome learning journey; Applying educational thinkers to contemporary educational practice; Values production through social and emotional learning; Policy research: In defence ad hocery?; We are all critically reflective now: The politics of critical reflection in higher education and in the work place; Developing critical thought about SEN; The refuge of relativism. Aimed at supporting students on Masters-level courses, this accessible but critically provocative text is an essential resource for those wishing

to develop a more critical understanding of the role, purpose and function of educational systems and practices.

Intercultural Postgraduate Supervision Catherine Manathunga

2014-06-27 The impact of globalisation and aggressive marketing by universities has increased the flow of international or culturally diverse students enrolling in postgraduate research degree programs outside their own countries. As access to postgraduate education widens, more local culturally diverse and Indigenous students are also enrolling in higher degree studies. As a result,

significantly more academics now engage in intercultural supervision or supervising students who are culturally different to themselves. This book argues that empowering intercultural supervision can result from more nuanced, critical and theoretically-based understandings of time, place and knowledge. It shows how a range of 'Southern' theories (including postcolonial, Indigenous, feminist, social and cultural geography theories) about history, geography and knowledge can offer fresh insights into intercultural supervision. The author suggests that by using the conceptual tools offered by these Southern theories, the more complex but potentially rich aspects of intercultural supervision can be better understood and grappled with. In particular, these theories enable

us to challenge assumptions about the universality and timelessness of Northern knowledge, and to create space for the recovery and further development of Southern, Eastern and Indigenous knowledges within intercultural supervision. This book will be of value to academic supervisors and postgraduate students, especially those engaged in intercultural supervision, as well as researchers and scholars in the field of higher education.

Strengthening Postgraduate Supervision Sioux McKenna 2017-03-22
An excellent collection of diverse and deeply reflective perspectives.

All offer insights into the multiple challenges confronted in improving the quality and depth of postgraduate supervision, increasing throughput, and dealing with complexity. What is also affirmed is the importance of individual capability in supervision that is developed and nurtured over time, and through arduous effort. The book will be of value to novice supervisors and to more experienced ones. Policy makers, planners and administrators looking to enlarge their understanding of the postgraduate terrain in all its complexities will find the mix of theoretical and practical lenses through which the topic is approached particularly illuminating. - Professor Narend Baijnath, Chief Executive Officer, Council on Higher Education

Postgraduate Voices in Punk Studies

Mike Dines 2017-06-23 This volume represents the first academic collection to draw upon postgraduate research in exploring the punk scene. Cutting-edge studies, spanning both local and global contexts, are covered with contributions from a range of academic disciplines, including art and design, sociology, cultural studies, English, and music. The chapters are loosely focused around three themes: scenes; gender, "race" and sexuality; and therapy and

laughter. The collection builds upon, and diversifies, existing academic work in punk studies covering such topics as “whitestraightboy” hegemony, straight-edge in France, CRT and the links between punk and the “rave” scene of the 1990s.

Latin American Panel on Post Graduate Education in Agricultural Engineering Health Humanities in Postgraduate Medical Education Allan D. Peterkin

2018-08-24 Most medical schools in the US, Canada and UK now incorporate some form of arts and humanities-

based teaching into their curricula. What happens in residency is another story. Most postgraduate programs do not continue the thread of such teaching although many residents would like to deepen their understanding of the medical humanities before they move into practice. The humanities emphasize “the human side of medicine”, and can provide a counterpoint to the reductionism of evidence-based medicine and technological hubris for young doctors as they apply new knowledge and skills in ambiguous, real-life encounters with patients who are living with complicated health problems. Humanities-based education can help both sides of the relationship: programs are shown to reduce burnout and mental health issues in young physicians, and can

also help learning practitioners grapple with the most difficult aspects of their craft: how does one persuade patients on a course of treatment, while respecting informed consent? How does one work with families? How does one listen to and treat patients exhibiting self-harm tendencies? Available research may demonstrate the efficacy of such exposures, but provide little practical advice or resources for setting up programs across specialty and sub-specialty disciplines. *Health Humanities in Post-Graduate Medical Education* will fill this gap in knowledge translation for the thousands of residency programs worldwide, allowing educators, supervisors, and residents themselves to create robust and educationally sound workshops, seminars, study

groups, lecture series, research and arts-based projects, publications and events.

Spaces, journeys and new horizons for postgraduate supervision Eli Bitzer
2018-07-24 After centuries of barely visible incremental development, postgraduate education has experienced twenty years of considerable turbulence as governments recognise its latent power, some responding more quickly than others and each in different ways. This anthology, drawing on research, deep reflection and praxis, illustrates the current situation in a range of geographical environments that result from such interventions, or lack of them, providing readers both with information about neglected contexts, challenges and concerns and with stimulating ideas about how they

might be managed more effectively.

Planning Your Postgraduate Research
Margaret Walshaw 2017-09-16 This
comprehensive and easy-to-use book
supports postgraduate researchers in
the early stages of their project.
Written in an engaging and accessible
style, it helps readers to clarify
what they want to research and how to
conduct that research. Each chapter
covers a key stage in the process,
from selecting an appropriate
research topic and developing a
working research question through to
assimilating and evaluating relevant
literature. It then guides
researchers through the process of
writing a literature review,

selecting a research methodology and
creating a research proposal. This
invaluable guide is ideal for PhD and
Masters students alike and will equip
them with the skills needed to get
their research project underway

The Postgraduate's Companion Gerard Hall 2008-09-12 The Postgraduate's Companion is the most comprehensive, practical and accessible source of support and guidance for anyone contemplating starting, or already undertaking, their research degree. Hall and Longman's invaluable book is an essential reference resource for anyone doing postgraduate research or thinking of doing it. Leading experts in their fields address the fundamental questions of what a research degree involves; how to choose the best institution; secure an offer; and fund your research degree. For students who are currently working towards a research degree the book deals with the

process thoroughly, including coverage of: getting the most from the supervisory relationship planning and writing the thesis navigating and succeeding in research training learning to teach in HE and balancing teaching and research beating the blues and learning how to complete in good time succeeding in the viva voce examination. The final section of the book covers what to do with a research degree once you have one. This includes identifying your skills; staying in academia; research outside academia; leaving research and academia; and starting your own business.
