Research Methods in Health Promotion Laura F. Salazar 2015-02-18
The bestselling textbook to understanding health research, updated and expanded Research Methods in Health Promotion provides students and practitioners with essential knowledge and skills regarding the design, implementation, analysis, and interpretation of research in the field of health promotion. Now in its second edition, this bestselling textbook has been updated with more recent research methodologies and additional information on sampling, participatory and survey research, and qualitative data analysis. The entire research process is covered, with specific points relating to both qualitative and quantitative research. By breaking the daunting process of research into simple and well-defined steps, this user-friendly text encourages students to think about research as a sequential process and provides explanations that facilitate better understanding of each step in the research process. A separate set of chapters cover the more quantitative methodological areas including designs, measurement, sampling, and data analysis in depth, giving readers the understanding they need to apply in practice. This book also provides applied chapters that illustrate the practical aspects of the research process, along with other critical information including grant writing and scientific writing. Evaluate the ethics, design, analysis, and

interpretation of research Identify and understand the key components of research studies Analyze and interpret the results of experimental and survey research designs Understand the process of publishing a research report and constructing a grant proposal Research Methods in Health Promotion is ideal for both undergraduate and graduate methods courses in health promotion and public health.

Be(com)ing a Conference Interpreter Veerle Duflou 2016-09-07 This study offers a novel view of Conference Interpreting by looking at EU interpreters as a professional community of practice. In particular, Duflou's work focuses on the nature of the competence conference interpreters working for the European Parliament and the European Commission need to acquire in order to cope with their professional tasks. Making use of observation as a member of the community, in-depth interviews and institutional documents, she explores the link between the specificity of the EU setting and the knowledge and skills required. Her analysis of the learning experiences of newcomers in the professional community shows that EU interpreters' competence is to a large extent context-dependent and acquired through situated learning. In addition, it highlights the various factors which have an impact on this learning process. Using the way Dutch booth EU interpreters share the workload in the booth as a case, Duflou demonstrates the importance of mastering collaborative and embodied skills for EU interpreters. She thereby challenges the idea of interpreting competence from an individual, cognitive accomplishment and redefines it as the ability to apply the practical and setting-determined know-how required to function as a full member of the professional community.

Achieving Student Success Donna Hardy Cox 2010-01-11 This incisive and luminescent story, scrupulously grounded in sixteenth-century sources, illuminates the power that "naming" has to create a world - in this case a world still haunted by being the accidental Indies. It is a book

about how we perceive and represent the world around us, about the creative and destructive power of language. Through its elaboration of the rich and lively ironies of the Columbus story, *The Accidental Indies* looks at the nature of storytelling itself.

Recruiting with Social Media Raj Anand 2010-08-03 Social media can transform the way you recruit. Using Facebook, LinkedIn, Twitter, and other social media platforms, you can connect with great new sources of talent faster and more effectively than ever before. You'll learn how to use social media to build an open, engaging two-way conversation with potential employees...target job advertising more efficiently and at lower cost...choose the right tools and platforms.... Packed with real case studies and actionable lessons, *Recruiting with Social Media* will help you recruit quality staff faster and at a lower cost.

Academic Culture: An Analytical Framework for Understanding Academic Work Kazumi Okamoto 2016-10-11 That we live in a world ruled and confused by cultural diversity has become common sense. The

social sciences gave birth to a new theoretical paradigm, the creation of cultural theories. Since then, social science theorizing applies to any social phenomenon across the world exploring cultural diversities in any social practice—except the social sciences and how they create knowledge, which is off limits. Social science theorizing seemingly assumes that creating knowledge does not know such diversities. In this book, Kazumi Okamoto develops analytical tools to study academic culture, analyze how social sciences create and distribute knowledge, and the influence the academic environment has on knowledge production. She uses the academy in Japan as a case study of how social scientists interpret academic practices and how they are affected by their academic environment. Studying Japanese academic culture, she reveals that academic practices and the academic environment in Japan show much less diversity than cultural theories tend to presuppose.

Database and Expert Systems Applications Sourav S. Bhowmick 2009-08-17 The annual international conference on Database and Expert Systems Applications (DEXA) is now well established as a reference scientific event. The reader will find in this volume a collection of scientific papers that represent the state of the art of - search in the domain of data, information and knowledge management, intelligent systems, and their applications. The 20th edition of the series of DEXA conferences was held at the Johannes - pler University of Linz, from August 31 to September 4, 2009. Several collocated conferences and workshops covered specialized and comp- mentary topics to the main conference topic. Seven conferences---the 11th Inter- tional Conference on Data Warehousing and Knowledge Discovery (DaWaK), the 10th International Conference on Electronic Commerce and Web Technologies (EC- Web), the 8th International Conference on Electronic Government (EGOV), the 6th International Conference on Trust, Privacy, and Security in Digital Business (Trust- Bus), the 4th International Conference on Industrial Applications of Holonic and Multi-Agent Systems (HoloMAS), the First International Conference on eParti- tion (ePart), and the Second International Conference on Data Management in Grid and P2P Systems (GLOBE)---and 14 workshops are collocated with DEXA. These events

formed a unique international forum with a balanced depth and breadth of topics. Its much appreciated conviviality fostered unmatched opportunities to meet, share the latest scientific results and discuss the latest technological advances in the area of information technologies with both young scientists and engineers and senior world-renown experts. This volume contains the papers selected for presentation at the DEXA conference.

Analysis for Time-to-Event Data under Censoring and Truncation

Hongsheng Dai 2016-10-06 Survival Analysis for Bivariate Truncated Data provides readers with a comprehensive review on the existing works on survival analysis for truncated data, mainly focusing on the estimation of univariate and bivariate survival function. The most distinguishing feature of survival data is known as censoring, which occurs when the survival time can only be exactly observed within certain time intervals. A second feature is truncation, which is often deliberate and usually due to selection bias in the study design. Truncation presents itself in different ways. For example, left truncation, which is often due to a so-called late entry bias, occurs when individuals enter a study at a certain age and are followed from this delayed entry time. Right truncation arises when only individuals who experienced the event of interest before a certain time point can be observed. Analyzing truncated survival data without considering the potential selection bias may lead to seriously biased estimates of the time to event of interest and the impact of risk factors. Assists statisticians, epidemiologists, medical researchers, and actuaries who need to understand the mechanism of selection bias Reviews existing works on survival analysis for truncated data, mainly focusing on the estimation of univariate and bivariate survival function Offers a guideline for analyzing truncated survival data
